

Water Meters

Like your gas or electricity meter, a water meter measures how much water you use.

We take readings from the meter and calculate your bill for our water and sewerage services. You could really benefit from having a water meter installed:

- You only pay for how much water you use, so you can save money by using less water.
- Readings are taken remotely, so we won't disturb you.
- We fit meters for free.
- 2 year trial period.

Scan the QR code to see if a water meter is right for you via the CCW calculator.
